

Apple Classroom meets FileWave

Leverage Apple Classroom with the power of FileWave

About Classroom

Learn the benefits of Classroom

Classroom is a powerful new iPad app that helps teachers guide learning, share work, and manage student devices. Teachers can launch a specific app, website, or textbook page on any device in the class, or share student work on a TV, monitor, or projector using Apple TV. They can even reset a student's password, see which apps students are working in, and assign a specific shared iPad for the class period. -apple.com/education/it

The FileWave Difference

Unique FileWave features that enhance the Classroom experience

COMPREHENSIVE SIS INTEGRATION

FileWave enhances the overall Classroom experience by providing comprehensive Student Information Services (SIS) integration with any SIS vendor - greatly expanding the number of compatible SIS systems. This unique feature ensures a school district's existing SIS system can be easily integrated and leveraged in Classroom and FileWave.

STUDENT IMAGES

FileWave provides the ability to link student image shares with Classroom, making it easier than ever to quickly identify students. This feature is great for teachers and even better for substitute teachers.

Leverage Apple Classroom with the power of FileWave

As an Apple highlighted MDM vendor for Classroom, FileWave is committed to enhancing the classroom experience by creating easy, robust, and effective solutions that improve teaching and learning while reducing IT's workload.
