

Endpoint Operations Done! Efficiently.

“FileWave is instrumental in keeping the disruption to a minimum – by eliminating the need for us to go and meddle with teachers' devices, which takes away instructional time. For example, whenever they need an app, we can just tell them to go get it in the self-service kiosk, and there are also instructions on how to set it up. **They can do that on their own time. They don't have to waste time with us on the phone or remote support.**”
