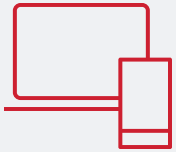
CHALLENGES BEFORE FILEWAVE



DIVERSE BYOD MODEL

The Kristin School adopted an innovative school-wide BYOD digital learning program for students in year 4-13, and due to the diversity of the school's device management needs, it was imperative that a solution would complement the technology being used and improve on systems previously in place.

LACK OF SELF-SERVICE

With the previous software The Kristin School had in place, they lacked self-service functionality, which was slowing down their timeline of expanding the BYOD model to more students.

WHY THEY INVESTED IN FILEWAVE

EASE OF USE

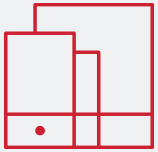
The school required a product that delivered on performance and enabled simple workflows with advanced functionality.

MacOS AND WINDOWS SUPPORT

A consistent user experience and similar functionality across Apple and Microsoft platforms was required.

SELF-SERVICE FUNCTIONALITY

They wanted the use of the FileWave Kiosk for app store capability to support expanding BYOD programs.



MOBILE DEVICE CAPABILITES

FileWave provided a path to MDM capability that was subsequently adopted.

SUPPORT

Training was organized to enable rapid product adoption and quick concept-to-use application capability

"Our use of FileWave has been successful. ***FileWave has been a key aspect of delivering an improved service experience.***"
